Before Contacting A Clinic

- Write your goal, budget, travel dates, medical history, medications, allergies, and previous treatment records.
- Confirm whether you are speaking with a clinic, hospital, registered agency, or independent coordinator.
- Save official Korean medical tourism resources before comparing private marketing pages.

Before Paying A Deposit

- Ask for one written document with treatment, doctor, date, price, refund rules, and included items.
- Confirm the legal name of the payment receiver and whether receipts are issued in your name.
- Keep invoices, receipts, bank details, screenshots, and the exact quote version.

Before Signing Or Receiving Care

- Ask who performs the procedure and which parts may be delegated to other staff.
- Request consent forms in advance when possible and ask for risks in a language you understand.
- Confirm anesthesia, aftercare, emergency contact, and complication handling.

Before Leaving Korea

- Receive records of what was done, medication names, warning symptoms, and follow-up instructions.
- Ask when flying, exercise, work, showering, sauna, and travel are safe.
- Plan care with a doctor in your home country if follow-up is needed.

Educational information only

Med-in-Korea does not verify, recommend, rank, refer, or book clinics. This checklist is not medical, legal, or emergency advice.
